Education

Aditya College of Engineering and Technology **2023-2027**
CSE-AIML *CGPA:8.97*

Relevant Coursework

- Data Structures and Algorithms
- Software Methodology
- Computer Networks
- Database Management System
- Artificial Intelligence
- Machine Learning

Experience

APSSDC **April-July 2025**
Data Analyst Intern *Online*

- Cleaned and prerocessed datasets using python(Pandas,Numpy) performed EDA to uncover key trends and patterns
- Built visualizations with Matplotlib and Seaborn to communicate insights effectively.

Cognifyz Technologies **Feb-March 2026**
Machine Learning Intern *Online*

- Preprocessed data and engineered features to improve model quality and prediction accuracy.
- Built and trained ml models(Scikit-learn)for classification/regression,evaluated using accuracy,precision,recall,F1-score.

Projects

Student Habits Performance Analysis | *Python,Numpy,Pandas,Matplolib,Jupyter Notebook* **July 2025**

- Analyzed student habits and academic performance data to identify factors influencing learning outcomes.
- Conducted data preprocessing and exploratory data analysis to uncover patterns and trends
- Generated visualizations and insights to support data-driven recommendations for improving student performance.

Smart AI Chatbot | *HTML,CSS,Javascript,Flask,Groq API,Visual Studio* **May 2026**

- Developed an AI-powered chatbot capable of understanding and responding to user queries in real time.
- Designed an interactive web interface and integrated AI APIs to generate intelligent responses.
- Enhanced user experience through efficient conversation handling and responsive chatbot functionality.

SmartHire AI | *HTML,CSS,Flask,Machine Learning,Deep Learning,python,NLP,RAG* **July 2026**

- Developed SmartHire AI, an intelligent recruitment platform that matches candidate resumes with job descriptions to evaluate suitability for a role.
- The system analyzes resumes, identifies relevant skills, compares them with job requirements, and generates match scores, skill-gap insights, and personalized improvement suggestions.
- It also supports recruiter and candidate workflows by conducting an AI-based test to assess candidate knowledge and overall job readiness, making the screening process more effective.

Technical Skills

Languages: Python, Java(Beginner), HTML, CSS, SQL
Python Libraries: Numpy, Pandas, Matplotlib, Seaborn,Scikit-learn,TensorFlow
Tools: VS Code,Jupyter Notebook,Google Colab,Git,Github,Claude,Napkin AI

Certifications

- Getting Started with Artificial Intelligence - IBM.
- Data Science for Beginners - FutureSkillsPrime.
- Data Analysis using Python - APSSDC.
- AI Tools Skillup - GeeksforGeeks.
- Basics of Data Visualization Analysis - LinkedIn Learning.
- Machine Learning with Python - IBM
- Principles of Generative AI - Infosys Springboard
